EDUCATION

PhD in Machine Learning – University of Oxford Topic: Deep Reinforcement Learning AIMS Centre for Doctoral Training EPSRC funding	Oct '22–Feb '27
MSc in Computer Science – University of Oxford Focus: Machine Learning Passed with distinction Full scholarship from DAAD	Oct '20–Sep '22
Study abroad – University of Illinois at Urbana-Champaign GPA: 4.0/4.0 Exchange programme with the Department of Computer Science	Aug '18–Dec '18
BSc in Informatics – Technical University of Munich (TUM) Passed with distinction (grade 1.1) Top 2% of cohort	Oct '16–May '20

EXPERIENCE

Student Researcher – Google DeepMind, Frontier AI Unit • Reinforcement learning for multi-turn interactions with LLMs	Feb '26–present
PhD Research – Department of Computer Science, University of Oxford • Instruction following and generalisation in deep RL • Developed an approach for zero-shot execution of general formally specified tasks (ICLR'25 oral) • Follow-up work on representation learning (ICML'25 workshop), robotic applications (under review), multi-task safety guarantees (under review), and LLM agents (in progress)	Oct '22–present
Deep Learning Research Intern – QuantCo Ltd. • Research on LLM agents for completing complex web-based tasks in custom user interfaces • Focused on long-horizon tasks and integrating ground-truth demonstrations • Developed scalable infrastructure for evaluating and benchmarking LLM agents • Concluded internship with a full-time return offer based on performance	Jun '25–Sep '25
Stipendiary Lecturer & Teaching Assistant – University of Oxford • Led small-group undergraduate tutorials (St Hugh's College) on Algorithms and Computer Networks • Taught a PhD course on Gaussian processes to first-year students	Oct '24–Mar '25
Software Engineering Intern – CQSE GmbH • Full-stack development of the TeamScale software intelligence platform • Redesigned the frontend and improved performance of rule browser via dynamic loading • Added new language constructs to the TypeScript lexer and parser	Jun '20–Aug '20
Student Research Assistant – Chair for Theoretical Computer Science, TUM • Lead developer of dtControl , a tool for decision tree learning for controller representation • Developed novel algorithms resulting in a 96% size reduction for learned controllers	Jun '19–Jan '20
Machine Learning Intern – TNG Technology Consulting GmbH • Developed a deep learning image segmentation solution that was integrated into an internal image processing pipeline	Mar '17–Apr '17

SKILLS

Languages: Python, Java, C++, JavaScript / TS, SQL, Haskell
ML Frameworks: PyTorch, JAX, NumPy
